

Changing the Face of Gage Interface Marketing - ASDQMS's TV Network

Source: Advanced Systems & Designs, Inc. (ASDQMS)

Dated: Aug 18, 2011

ASDQMS is dedicated to staying on the cutting edge, and that includes allowing our customers to have a firsthand, exclusive look at their products!

Connecting your gage via USB or Keyboard and want more information? We are always coming up with innovative ways to spread the word about our gage to USB and Keyboard output products. Tired of reading long and complicated manuals and brochures about data collection interfaces? With the ASDQMS TV Network, all the information you need about our products is just a mouse click away, and you can get a firsthand look at the product before you buy it. We are changing the face of gage interface marketing, one ASDQMS TV Network episode at a time!

<http://www.youtube.com/asdqms>

With the ASDQMS TV Network, we have come up with a unique platform to showcase Advanced Systems & Designs, Inc. (ASDQMS) products, from our GageMuxes to SmartCables to SPC Software. Now, instead of just reading about them, you can literally see how they work, and how simple and effortless it is to interface them with countless other gages (Ono Sokki, Mitutoyo, Mahr Federal, CDI, Fowler, Starrett, and many, many more!).

Among the different episodes of the ASDQMS TV Network, there are not only product demonstrations of our various data collection interfaces (GageMuxes, SmartCables, FlashCables, etc.), but customer testimonials and hardware partnership episodes as well! Our range and variety of episodes truly demonstrates what a well rounded company we are, and how dedicated we are to product development and quality customer service within the quality control industries. Customer feedback has been overwhelmingly positive – Mark from Michigan wrote, “The videos are great! Not only are they professional looking and informative, but they also put a new spin on gage interface marketing. The testimonials especially gave me confidence in ASDQMS. Keep those episodes coming!”
