

## **ASDQMS Products Solve All Your Data Collection Problems! GageMux USB Emulates GagePort GP 2104**

*Source: Advanced Systems & Designs, Inc. (ASDQMS)*

*Dated: Oct 18, 2011*

*Advanced Systems & Designs, Inc. (ASDQMS) is always working to accommodate customers' unique data collection needs and solve their problems, and the new GageMux USB with GagePort GP 2104 Emulation is a prime example of this!*

Our customers are constantly giving us feedback, and calling us to troubleshoot their data collection problems and needs. We work hard to accommodate their needs and solve their problems. One such need was regarding customers who were using GE CimWorks Visual SPC and trying to connect their GagePort interfaces to their USB ports on their PC's. Have you tried to do this, but have been frustrated when you weren't able to do so? Well you're in luck, because ASDQMS has developed a version of our GageMux USB that emulates the GagePort GP 2104!

<http://www.youtube.com/asdqms>

With ASDQMS's new version of our GageMux USB, you can purchase RS232 and USB interfaces that will work with your GE CimWorks Visual SPC software! When Visual SPC opens up, it reads our GageMux as if it was the GagePort GP 2104. You can request readings by port or even trigger readings using individual footswitches.

Worried about switching software packages and subsequent compatibility? Don't be! If you decide in the future to switch Statistical Process Control Software packages, all you have to do is load the standard firmware into the GageMux USB and you are good to go! It's that simple. It's this combination of cutting edge innovation and user friendliness and simplicity that makes ASDQMS stand apart from our competitors. As with all of our other interfacing products, this version of the GageMux USB is patent pending, as well as has a LIFETIME WARRANTY! You can't beat the quality and service of ASDQMS.
