ASDQMS's Hardware Partnership with Plex Systems!

Source: Advanced Systems & Designs, Inc. (ASDQMS)
Dated: Nov 09, 2011

Advanced Systems & Designs (ASDQMS) believes in a high standard of quality for our data collection interfaces, and expects no less from companies we partner with.

In addition to ASDQMS's innovation and cutting edge patent pending product development, we also have long standing and solid hardware partnerships with several gage manufacturers. We are happy to announce that one such partnership is with Plex Systems, a provider of SPC software.

 Plex Online Software as a Service (SaaS) ERP has a global reach; the Cloud ERP system connects and manages the entire manufacturing process for organizations in North America and their global subsidiaries. Plex Online manufacturing ERP software provides unparalleled coverage and access to operational intelligence. It enables managers to make decisions based on real-time data, which leads to continuous improvement and lean management – two large benefits for any business!

 Plex Systems' ERP Software is another example of how easy it is to interface ASDQMS gage interfaces with a wide variety of hardware and software products. Connecting our GageMux USB Keyboard or SmartCable Keyboard is as easy as making the readings appear as they were typed in by a keyboard. This makes the operators' and IT managers' job easy to capture data from electronic gages and enter it into Plex Systems' ERP software. ASDQMS and Plex Systems is an efficient and economical partnership, saving time and money!

 To use the GageMux USB Keyboard and SmartCable Keyboard with Plex Systems' ERP Software, it's as easy as plugging the gage into the GageMux, and then plugging the SmartCable Keyboard into the PC! From there, you follow the steps to use the software and enter data into the appropriate fields as if it were inputted using a keyboard. It's truly a seamless partnership!
