

Wireless Gage Gadgets to connect your Mitutoyo Wireless UWAVE System to any device!

Source: Advanced Systems & Designs, Inc. (ASDQMS)

Dated: Sep 09, 2011

ASDQMS enables you to connect your Mitutoyo Wireless UWAVE System to any brand of gage. If it has an output, we can make it wireless!

Advanced Systems & Designs, Inc.'s (ASDQMS) line of SmartCables was specifically developed to stay on the cutting edge of technology, and the PATENT PENDING **SmartCable Mitutoyo UWAVE Adapters** are a perfect example of ASDQMS's dedication to staying on the forefront of our field. Have you been trying to connect your non-Mitutoyo gages to your UWAVE system without success? Well you're in luck, because we designed the SmartCable UWAVE to connect ANY brand of gage or electronic device to the Mitutoyo UWAVE transmitters!

<http://www.spcanywhere.com>

Plenty of customers are asking us for inexpensive wireless gage interfaces, and who can blame them? Who wouldn't want to replace gage cables forever (so long as the wireless transmitters don't disappear from the plant)? We've researched the technology, and have come to the exhaustive conclusion that the Mitutoyo UWAVE Wireless system has all the others beat, so we decided to work with Mitutoyo's solution by providing SmartCable UWAVE interfaces for the NON-Mitutoyo gages:

- RS232
- Ono-Sokki
- Chicago Dial Indicator
- Mahr Federal
- Fowler OPTO gages
- Tesa
- Toledo
- Metronics
- Ono Sokki
- Weigh scales
- Keypads
- Bar code scanners
- Ohaus Weigh Scale
- .. and many more!

The SmartCable Mitutoyo UWAVE Adapters have a small internal battery that converts the gage signal so that the UWAVE transmitter thinks it is a Mitutoyo gage; they can work on their own NiCad batteries for years. You can trigger gage readings using the UWAVE send button, or our built-in footswitch. As with all of our other products, NO SOFTWARE WEDGE is required!
